Suraj Manandhar
Kalimati,
Kathmandu Nepal

Dear Hiring Team,

I am writing to express my interest in the position of Intern Front-end Developer with a specialization in React. I have always been passionate about technology and the impact it can have on our lives. As a student of computer science, I have gained a strong foundation in programming and web development. I am confident that my skills and enthusiasm for this field make me an ideal candidate for this position.

I am particularly excited about the opportunity to work with React, as I believe it is one of the most innovative and dynamic front-end development frameworks available today. My previous experience with React, combined with my familiarity with HTML, CSS, and JavaScript, have helped me to develop a strong understanding of the principles of front-end development.

I am also a quick learner and am able to pick up new technologies and tools quickly. I am confident that I can contribute to your team from day one and that I will be able to learn from the experienced professionals in your organization.

In addition to my technical skills, I possess excellent interpersonal and communication skills. I have experience working in teams and understand the importance of effective collaboration to achieve project success. I am also committed to meeting deadlines and delivering quality work, ensuring that projects are completed on time and to the satisfaction of all stakeholders.

Thank you for considering my application for the Intern Front-end Developer position. I look forward to the opportunity to discuss my qualifications further and to learn more about this exciting opportunity.

Sincerely,
Suraj Manandhar

Suraj Manandhar

Front-End Developer(ReactJs)

SUMMARY

As a Frontend Developer, I specialize in creating engaging and intuitive user interfaces that deliver exceptional user experiences. With expertise in HTML, CSS, and JavaScript, along with a strong understanding of ReactJS and its ecosystem, I am able to create responsive and visually appealing interfaces using various libraries and frameworks. I possess excellent communication and collaboration skills, making me an effective team player. Overall, I am a self-motivated individual who is committed to staying up-to-date with the latest industry developments and continuously improving my skills.

Prime IT Club (+2)

Vice-president / kathmandu / May, 2017 - December, 2017
As Vice President of an IT club, my responsibility includes supervising the daily operations of the club and working with other leaders to design and implement strategies to promote the club's mission and goals. I have substantial expertise in establishing connections with sponsors and partners to gain financing and support for the club. In order to promote the club and interact with the community, I have also planned and coordinated tournaments and events on both a physical and online level. The creation and execution of recruitment techniques to entice new club members has been one of my responsibilities as vice president. In order to keep the club's social media accounts and website active and current, I have worked to maintain and update them.
I also have expertise overseeing the club's finances and making sure they are handled efficiently and openly. I have gone to trade shows and conferences as a club representative to spread the word about the group and form connections with other members of the IT sector. Overall, I am a determined leader with a demonstrated track record of driving development and success in an IT club. I work well in teams because I have strong communication and teamwork abilities.

PROJECTS INVOLVED

Hotel Management System For Hotelkesu home

The "Hotel Management System" is a web-based application that focuses on managing basic operations in a hotel, including booking rooms, managing staff, and addressing complaints. It allows customers to book rooms with ease and helps the hotel keep proper information about room details. The system was created using HTML, CSS, JavaScript, Bootstrap, Ajax, and PHP and is linked to a MySQL database. The project aims to improve the efficiency of managing records in the hotel, which was previously done manually due to the lack of a software solution. Overall, the system is adaptable and can be used on any device with a web browser.

Gas Booking and Delivery System

The Gas Booking & Delivery System is a computerized software that allows customers to book gas cylinders online and check the details of the delivery person and the gas price. It also automates the manual system and reduces errors and delays. The system has three modules: admin/staff, user and driver. The system aims to provide a simple and secure environment for the customers and improve their satisfaction. The system was created using HTML, CSS, JavaScript, Bootstrap, Ajax, and PHP and is linked to a MySQL database.

SBK Notes

SBKnotes is a website that provides study materials for Bachelor of Information Management students from Tribhuvan University in Nepal.The website was created without a database using HTML, CSS, and JavaScript. The project's goal was to illustrate a skill that we learned over the semester.

Myportfolio

Myportfolio is an online platform that displays my work and skills. It act as an online resume or business card that can be used to network, showcase my work. it is made using Html ,Css and JavaScript
